

Dr. Juli Carrillo Biography

Dr. Carrillo is an Assistant Professor at The University of British Columbia in the Faculty of Land and Food Systems. Her current research focus is on basic and applied ecology and evolutionary biology of agricultural systems. She received her PhD from Rice University in plant ecology and evolution. Prior to joining the faculty at UBC, she was an NSF Postdoctoral Research Fellow at Purdue University. Her expertise is in invasive species management, pest management, entomology, agriculture, ecology and evolutionary biology. Her particular focus is on tri-trophic interactions among plants, pests, and predators, with emphasis on plant defensive signaling and behavior, and above and below ground species interactions.
