

ANDREA BRADFORD

Dr. Andrea Bradford obtained her Ph.D. from Queen's University at Kingston in 1999. Her dissertation addressed the water balance and hydroecology of Minesing Swamp, near Barrie, Ontario. She has had five years' experience in environmental consulting and two years' experience in the Water Policy Branch of the Ontario Ministry of the Environment. Her teaching and research is currently focused in the areas of urban water systems, low impact development, ecological flow assessment, and stream and wetland restoration. She lives in Guelph, Ontario with her husband and three children.

Her research interests include the following:

- Hydroecology and Ecological Flows
- Wetland and Stream Restoration
- Rainwater Management / Low Impact Development
 - Permeable Pavement
 - Bioretention
- Water Resources Policy
