

Ms. Julia Pohling Biography

Ms. Pohling, Marine Biotechnologist in the Marine Institute (since 2012), works primarily on industrial process optimization, pilot-scale process design, and research on waste management and by-product utilization. From 2012-2014, she led the optimization and pilot scale on the development of the CASD Chitin Extraction Process. Ms. Pohling will be responsible for the validation of the intermediate scale process, small scale optimizations, scale-up calculations and the feasibility study.
