

Mr. Brandon Hebor Biography

Brandon Hebor is the COO and Co-Founder of Ripple Farms Inc. He holds an HBSc. in Environmental Science and Biology and Sustainable Business Management Certificate from McMaster University and Seneca College respectively. Brandon has accumulated over 8 years of applied experience in horticulture with 3 years of experience in Aquaponics operations.

As the COO of Ripple Farms, Brandon is responsible for the oversight of operations, including data collection and analysis of plant tissue, root development and production analytics. His core responsibilities include: the oversight of operations, including production management and data collection for both plants and aquatics. In addition to operational oversight, he manages the procurement of plant species, the maintenance of production aligned to local culinary trends and the modelling of productivity data into forecasts for sales.

As Ripple Farms prepares for the commercialization of their aquaponics operations, he is responsible for the oversight of research and continued innovation in our greenhouses. Building on existing relationships with industry and institutions / researchers, Brandon is excited to continue the applied research and analysis of plant and aquatic microbiology to develop new flavour profiles, greater plant productivity and improved consistency in Ripple Farms operations.
