

James Dyck

James Dyck is the Engineering Specialist for Crop Systems and Environment with the Ontario Ministry of Agriculture, Food and Rural Affairs (OMAFRA), based in Vineland Ontario. James was raised on a cash crop and hog farm in the Niagara Region, and completed his Mechanical Engineering degree at the University of Waterloo. His work at OMAFRA focuses on best practices, innovations and environmental impacts of grain drying and storage, precision agriculture, field equipment, and on-farm energy use.
