

Lindsay Miller

Lindsay is an adjunct professor in Civil Engineering and Instructor in Technical Communications at the University of Windsor. Lindsay has notable research experience in energy systems with a focus on renewable energy, energy finance, and the environmental and economic impacts of energy technologies and sources. She has also collaborated on several research projects on various topics including air quality, which was the focus of her doctoral research, and sustainable materials selection, which was the focus of her post-doctoral research. Lindsay has also been involved in engineering pedagogy research with a focus on bringing engagement into large classrooms. As a steering committee member for Women and Inclusivity in Sustainable Energy Research (WISER) and Electricity Human Resources Canada (EHRC)'s Women in Leadership, Lindsay is passionate about promoting diversity and inclusion in the energy sector and in the field of engineering. Lindsay has several publications in her research areas and, along with her colleagues, has hosted many workshops, conferences, and events across North America.
